

**MADUMBI SUSTAINABLE AGRICULTURE
COVID-19 - 24.03.2020**

Covid-19 Lockdown Implications

Covid-19 has reinforced Madumbi's ongoing commitment to growing healthy food sustainably.

Agriculture falls within the essential and critical business continuity services. Madumbi commits to working proactively to ensure our solutions get to all growers as needed.

- Our Key Account Managers are available for telephonic and virtual support. Please continue to contact them directly.
- Madumbi's product supply remains open:
 - The Madumbi Distribution Centre is operational with skeleton staff to ensure continuous supply.
 - Our national consignment depots are fully stocked for direct access.
- Madumbi's Business Administration, Communication and Innovation platforms will continue to operate remotely. Our office number remains active on 033 - 342 3984.

At Madumbi we strive to take quantum actions and remain agile in our VUCA world (Volatile, Uncertain, Complex and Ambiguous).

Now more than ever, we commit to supporting growers in building bio-active soils, maximising root and plant health and providing pest management solutions which have minimal impact on our environment – and everyone in it.

Let's remain resilient and partner together to feed our nation – together we are stronger.

Michelle Lesur
Madumbi Managing Director
