

V¹² Fruit

(B4511)

FERTILISER GROUP 2

Reg. No. B4511, Act 36 of 1947 / N-F0818

V¹² Fruit is a unique formulation of boron together with amino acids, vitamins and natural plant growth stimulants (e.g. kelp and brassinolide) to support and stimulate the flowering and fruiting phase of crop growth.

Application Instructions:

Method: Foliar application. Minimum water volume of 150 L/ha.

Rate:

- Row crops (maize, wheat, etc.) - 250 ml/ha applied at flowering.
- Vegetables & small fruit - 500 ml/ha applied at flowering and repeated during fruit development.
- Orchards & vines - 500 ml/ha applied at flowering and repeated during fruit development.
- Apply in morning or late afternoon.

PRECAUTION

When mixing with other fertilisers always jar test for compatibility.
Mix well before dispensing into application tank.
